Suntree Technologies, 798 Clearlake Rd, Cocoa, FL 32922 Ph: 321-637-7552 www.suntreetech.com

The **City of Lakeland, FL** takes a progressive stand to prevent debris from entering Lake Hollingsworth by installing inlet filters. Like silent unnoticed sentries throughout the neighborhoods surrounding the lake, a variety of inlet filters protect the water from debris and contaminates.

Lakeland Installs High Capacity Curb Inlet Basket...One Of Many

***Multi-Stage Filtration
And Stainless Steel
Screens of Different
Sieve Sizes
Optimize Filtration
And Water Flow***

The **High Capacity Curb Inlet Basket** is ideal for inlets that have only a round manhole for access.

It's not made on a sewing machine and you can't roll it up and stick it in your pocket.

Coventry & Lake Hollingsworth Drive

The strength found in marine grade fiberglass and stainless steel combine to make up a hydrodynamic stormwater filter that can capture hundreds of pounds of sediment, foliage, liter...**It is permanent infrastructure!**

The stainless steel screens are easily cleaned and ensure maximum durability for a long service life. After each service all the original flow rates of the screens are restored. Unlike bag filters, the Suntree warranty covers the **Curb Inlet Basket** for a period of 5 years.

5 Year Warranty

The Basket Can Be Easily Removed For Servicing

The shelf system mounts to the walls of the catchbasin, positions the removable basket under the manhole for easy access, and directs the water flow toward the basket. If the flow exceeds what can pass through the basket or if the basket become completely full of debris, the water flow will pass over the system and flow down the backside of the catch basin. The entire basket and shelf system is below the road so there is never a chance filter will obstruct the water flowing into the inlet.

Step 1

Reach into the manhole and raise the lifting handle.

Step 2

Lift the basket. The basket is sized so that it is as large as possible yet still passes through the manhole.

Step 3

Once the basket is removed it can be emptied and the screens brushed off.

Can Be Serviced By Vacuum Truck Without Tearing

Servicing by vacuum truck is no problem. The *Curb Inlet Basket* will not suck up into the vacuum and has the strength not to be torn by a vacuum.
