GR8 Protector™

The GR8 Protector™ is a temporary grate inlet protector used on construction sites to achieve NPDES compliance. Patented GR8-Protectors and fasteners are both lightweight and portable making them easy to install and clean without needing removal, saving time. The GR8 Protector filters trash and sediment from washing into the catch basin and can be outfitted with optional StormBooms™ to capture oils while also resisting clogging.

Model	Width	Length	Riser
GR8-24-24-TNA (Flat Grate)	24"	24"	N/A
